CUSTOM SELECT

Introduction

There are many possibilities when it comes to choosing cable. The *Custom Select* service allows the customer to decide which cables to include in their overall jacket.

- Be the designer of your own snake cable
- Choose multiple wire and cable types from our inventory to combine and we'll give it a jacket (Inners includes copper single conductor, multi-conductor, twisted pair, coax, category, fiber optic and more)
- Outer jacket compounds include: TPE, TPR and PVC (Extreme flexibility, indoor or outdoor/direct burial or permanent installation)
- Fit your studio, remote, or installation needs exactly (Custom print your name and / or footage markers at no extra charge)
- Need a connector too? Our FocusGuide system can be matched to the cable

Benefits

- Options include indoor, tactical, fiber/copper, or hybrid fiber cables
- Utilize a custom cable to achieve the most of your installation
- Use with your Audio/Video equipment for a custom application
- Include fiber cables with copper for a better broadcast production
- Choose from many combinations to accommodate your needs. For example, outdoor cable, digital cable or power cable
- Combine your most efficient cables in one jacket

How to begin

Once you are sure of your cable, it's as easy as calling Clark and talking to a sales manager about the service.

Call Clark Wire & Cable Today for your *Custom Select* cable.

1-800-CABLE-IT
